

Citric Acid Fermentation:

Micro organisms used in fermentation of -

Fungi:

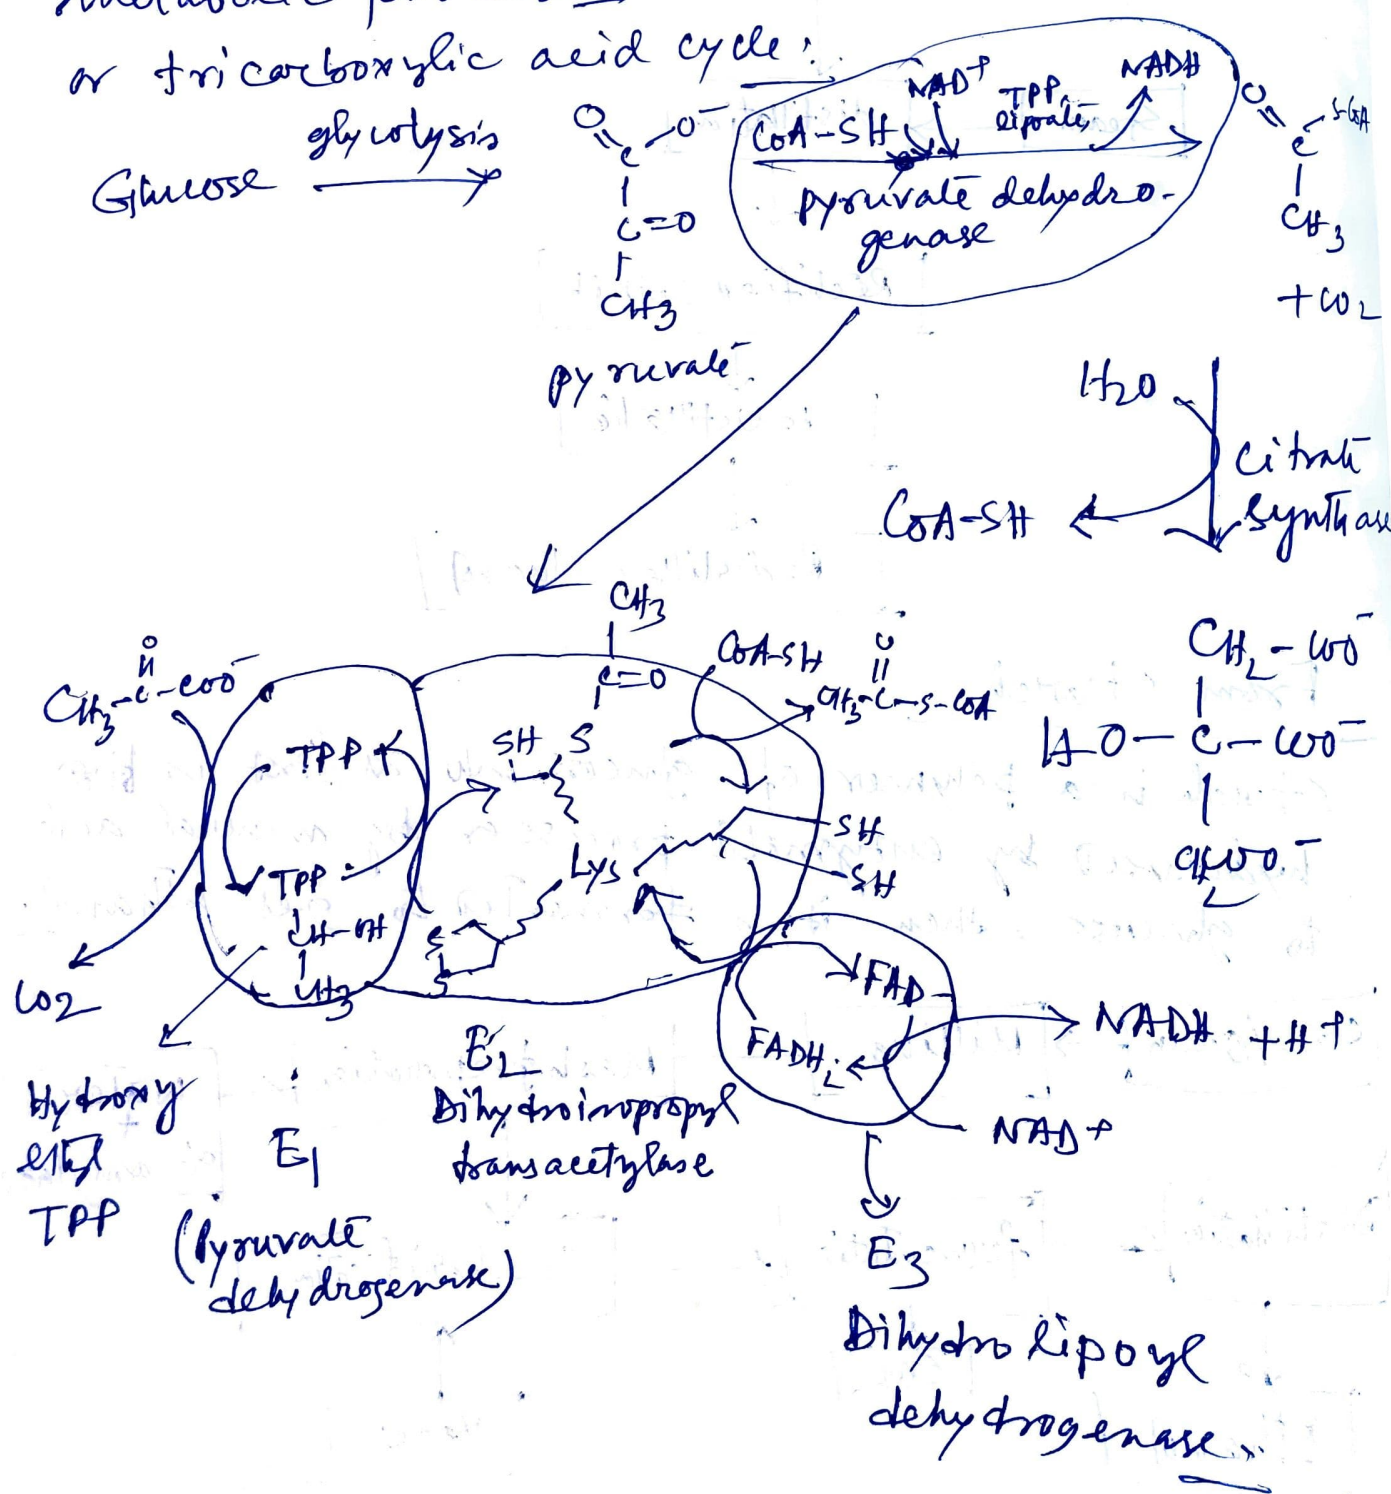

- ① *Aspergillus niger*.
- ② *A. aculeatus*
- ③ *A. awamori*

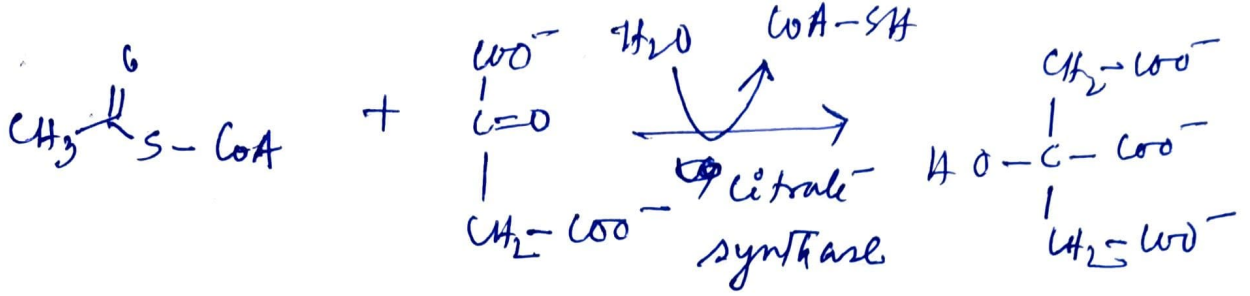

Yeast:

- ① ~~Saccha~~ *Saccharomyces lipolytica*.
- ② *Candida tropicalis*.

Bacteria: ① *Bacillus licheniformis* etc.

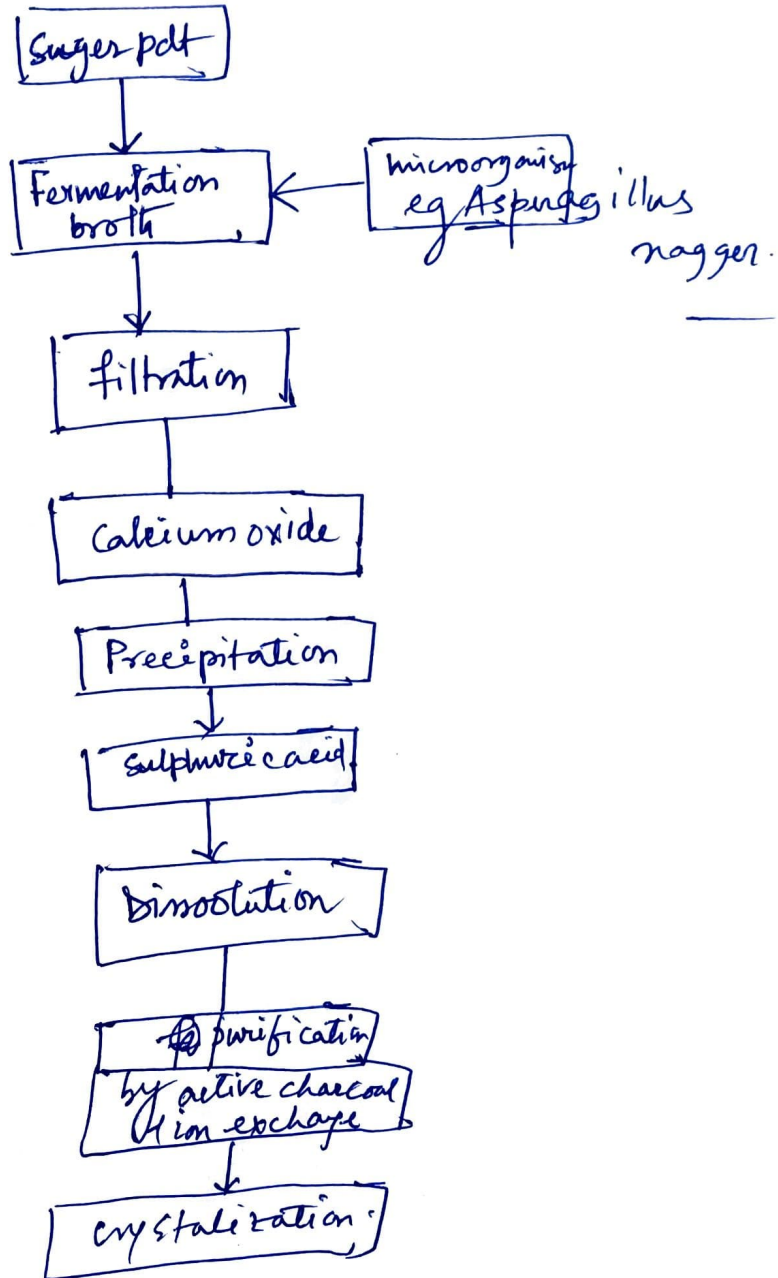

Citric acid is produced in ~~the~~ Krebs's cycle in metabolic process. It also called TCA cycle or tricarboxylic acid cycle.

Ref: Lehninger p. 601

"Production"

(In presence of oxaloacetate)
